

ZAVIO B7320 3MP WDR Outdoor Bullet IP Camera

- 3 megapixel CMOS sensor
- True WDR up to 100dB
- 4 high performance IR LEDs and up to 30m distance
- Built-in heater and fan
- IP66 weatherproof housing
- Varifocal

The 3 megapixel B7320 bullet IP camera is designed to withstand harsh outdoor and tough environment.

The B7320 can capture video at resolutions of up to 1920x1080 (maximum 2048 x 1536) at frame rates up to 30 fps. With true WDR (wide dynamic range) capability ensures that no part of the image is too bright or too dark, can provide clear image quality even at backlight conditions, making the B7320 ideal for high-contrast environments.

The IP 66-rated housing with -40°C to 60°C temperature protection, it makes the camera invulnerable to harsh rainstorms and scorching heat. B7320 also outfitted with IR LED illuminators and gives a viewing range of 30m to achieve excellent day & night functionality.

Besides, the included ZAVIO CamGraba2.0 is the most professional NVR software for free bundled can support up to 64 IP cameras.

WDR (Wide Dynamic Range)

Dynamic range is the ratio of the maximum signal output of the sensor to the smallest signal output of the sensor. In other words, dynamic range is the ratio of the brightest portion (maximum output) of the image to the darkest portion (smallest output) of the image.

In a scene with extremely bright and dark areas or in backlight environment such as entryway, a typical camera would produce an image where objects in the dark areas would hardly be visible. WDR(Wide dynamic range) can solve this by applying techniques such as using different exposures for different objects in a scene to enable objects in both bright and dark areas to be visible. WDR IP cameras are usually recommended for situations where light enters a premise from various angles such as a multi-window room.
